

## L-AZIDOHOMOALANINE (AHA)

**SKU:** CCT-1066

### Description

L-Azidohomoalanine (AHA) is an amino acid analog of methionine that contains a very small modification, specifically an azido moiety that can be fed to cultured cells and incorporated into proteins during active protein synthesis. Detection utilizes the chemoselective ligation or “click ” reaction between an azide and an alkyne or cyclooctyne. The azido-modified protein is detected with either fluorescent alkyne or biotin alkyne. Detection sensitivity with these reagents in 1-D gels and Western blots is in the low femtomole range and compatible with downstream LC-MS/MS and MALDI MS analysis.

### Specifications

<b>Unit Size</b>	25 mg, 100 mg, 1000 mg, 5 g
<b>Molecular weight</b>	180.59 (HCl salt)
<b>Chemical composition</b>	C <sub>4</sub> H <sub>9</sub> ClN <sub>4</sub> O <sub>2</sub> (HCl salt)
<b>CAS</b>	942518-29-8
<b>Solubility</b>	Water, DMSO, DMF
<b>Purity</b>	>95% (H NMR)

**For research use only. Not intended for therapeutic or diagnostic use in animals or humans.**

<b>Appearance</b>	White crystalline
<b>Storage Conditions</b>	-20°C.
<b>Shipping Conditions</b>	Ambient temperature
